Introduction

Thank you for purchasing the ***QuietFlo™*** True HEPA Air Purifier from Hunter Fan Company. You have purchased our latest development in portable Air Purification Systems. This system has been developed to improve the quality of the air you breathe.

Our ***QuietFlo™*** True HEPA Air Purifier out performs other air purification systems by quickly and effectively removing dust, smoke, and pollen particles. Room air is pulled in through the front grille and cleaned across the HEPA filter. Clean air is then released out the top grille.

The HEPA filter will remove 99.97% of particles 0.3 microns in size from air that passes through the filter.

The activated carbon pre-filter helps remove cooking, smoke, and pet odors from the air. It also traps lint, hair, and large particles, which helps improve the life and performance of the HEPA filter.

Setting Up Your Air Purifier

1. Remove your air purifier from the box and take it out of the clear plastic protective bag.
2. Place your ***QuietFlo™*** Air Purifier on a firm, flat surface.
3. Before turning the Air Purifier 'on', you need to open the front grille. To release the front grille, press the tabs until the front grill slides easily over the tabs. Refer to Figure 1.
4. The HEPA filter is already installed in the correct position, but you need to confirm that it is fully inserted. To remove, grasp the edge of the filter frame and pull it forward. Notice the orientation of the flaps and seal, which should be pressed firmly into the filter opening.
5. The carbon pre-filter is mounted inside the front grille with "hook" tape. Confirm that it covers the grille vents. Refer to Figure 2.
6. Place the filter installation reminder sticker on the inside edge of the front grille. Circle the month and write the year of installation for the pre-filter and HEPA filter.
7. Replace the filter and front grille. Be sure that the bottom grille tabs are in position first, and then push the top of the grille forward until it is closed. The unit is now ready for normal operation. NOTE: This unit will not operate unless the door is placed in the correct position.
8. Plug the unit into a 120V electrical outlet.

Operating Your Air Purifier

On/Speed Control: Rotate the Speed Control knob to set the desired speed. A setting of zero (0) indicates that the unit is off, one (1) is low speed, two (2) is medium speed, and three (3) is high speed. The fan speed can be adjusted at any time.

Cleaning And Filter Replacement

1. Clean the outside of the unit with a soft, damp cloth. The front grille can be removed and cleaned in soapy water. Remove the pre-filter before cleaning the front grille.
2. **At least every 90 days, open the front grille, remove the carbon pre-filter, and replace it.** This is necessary to maintain proper odor-removing and overall filtration performance. If necessary, it can be changed more often. Mark the new filter installation sticker included with the new carbon pre-filter. **Be sure to remove any plastic wrapping that may be on the new filter before you place it into the Air Purifier.**
3. While replacing the pre-filter, you should view the condition of the ***QuietFlo™*** HEPA Filter. Compare the filter to the color coded chart that is on the inside of the housing. If the filter matches the dark color on the chart, you should remove the filter and replace it with a new filter. Mark the new filter installation sticker included with the new ***QuietFlo™*** HEPA Filter. **Depending on use and environment, the HEPA Filter should last one year.**
4. If you notice a decrease in air output or an increase in noise, the HEPA Filter may be clogged. Replace it with a new ***QuietFlo™*** HEPA Filter.
